

Therapist Consultation Report

Outpatient visit summary

PATIENT	Admin Patient
VISIT DATE	22 Apr 2026
DOCTOR	Dr. Alisher Karimov
SPECIALTY	General Practitioner / Therapist
CLINIC	Klinika Zdorovye, Khujand

Chief complaint

Patient presents with a 3-day history of mild fatigue, low-grade fever (37.6°C peak), and dry cough. No shortness of breath, chest pain, or hemoptysis.

Examination

Vitals: BP 122/78, HR 78, SpO2 98%, T 37.2°C. Lungs clear to auscultation bilaterally. Heart RRR, no murmurs. Pharynx mildly erythematous, no exudate. Lymph nodes non-tender.

Assessment & plan

Acute viral upper respiratory infection.

1. Symptomatic care: rest, fluids, paracetamol PRN for fever.
2. Recheck in 5 — 7 days if symptoms persist or worsen.
3. Return immediately if shortness of breath, chest pain, or fever > 39°C.
4. Complete blood count ordered to rule out bacterial superinfection.
